

They've done it again!

Marathon Petroleum comes through for local students! They have once again generously agreed to sponsor 25 simulated missions at the Challenger Learning Center of Alaska! These missions are available to all 5th and 6th grade classes from Kenai Peninsula School District. Missions are granted on a first come first serve basis - APPLY TODAY!

This is a perfect opportunity to immerse your class in an exciting space based learning environment. Are your students ready to take on the challenge of building a new micro satellite during risky solar activity? Will your students be up the challenge of returning to the moon and establishing the first lunar base? Or are your students inspired by the success of the mars rovers enough to take part in a visit of their own? With three missions to choose from, you have the option of selecting the mission that you deem appropriate or you can simply allow your students to vote on their favorite option. To review the three mission scenarios, please visit www.akchallenger.org

Once again this year, we ask that your mission is scheduled prior to March 1, 2020. We are extremely grateful to Marathon for the continued support of our students!!!

Applications will be received on a first come, first serve basis with 6th graders receiving priority. Only completed applications will be accepted. Grantees will be required to complete pre and post assessments as required for reporting purposes.

To schedule your mission contact Laura Mese.
